Hi Dirk,

FYI - I have (4) principals in Detroit next week...I need to see David and understand what is going on, so let me know how we can do this. Perhaps breakfast on Friday the 14th in Detroit...?

I look forward to your call.

Hi Ellen,

I just sent a reminder to BeStar for you. Hopefully, they will get back to me by tomorrow.

David has changed his travel schedule and will arrive now next week. I have set up meeting in Columbus with FB on Wednesday and need to decide how to spend Thursday and Friday. I will call also Matt and Carol to discuss. FG is flying in to Chicago, but I don't have the date, so I need to confirm to see if/when he can come down to Indy.

Best regards, Dirk

Dear Dirk,

I been trying today without any success to get a hold you at your office, the idea here is as it follows :  
 Given the prices we had managed to have since last May and some additional business that are cooking as the new speaker model I propose to you to move in advanced the savings as they are. This means moving the 2008 price to be effective in December of this year.  
 Let me know when can we go ahead in changing the PO price.

Thank you & Regards  
 Pablo Cano

Subject Re: Ford Warranty Returns!

Hi Cathy;

Please resend the temperature / Humidity logs. They were hard to print and we could not read them easily. 1 of the is for 2006, but the heading says 2007. Please submit pictures of the old and new inspection method and also I need you to tell me when they are implemented. As far as the tracking Log for the Glue Aging Please make the change ASAP. This is critical and must be done ASAP in order to Close. I need to identify the action plans ASAP. If you can we would rather see the tracking ticket for the Lot as I sent you. If you can, please call me today so we can discuss further. I must turn in a Lesson learned Card by Wednesday my time. The management is putting pressure to close and is requiring all the proper data. I will also mention that I do not agree with the Implementation of the Air-conditioning in the Work Shop in April 2005. I was there in May of 2005 and No air conditioning existed and the Work shop was in the Production Area, not where it is located now. It also moved from it's location in March of 2006 to where it is now sometime between then and November of 2006.

Please call so that we can avoid anymore confusion.

Thanks

Dear All,  
I just learned that today Florian Meffert resigned. He was the last  
technical person.  
His main responsibility was Fire and Security. That means that there is  
nobody left  
who can handle the technical part of the siren business.

Best regards

Dear David, Florian:

I checked with Matt and they have now decided to postpone the trip to Germany until the 1st Quarter of 08, thus please feel free to schedule your visit during the week of 10 December if necessary. He is in agreement with my suggestions regarding customers and as soon as you advise your available time, we will put together a good schedule.

best regards, Dirk

Dear David,  
dear Dirk,

I just received a call from Carol. She and Matt will come over to Germany in December.

They will visit the week beginning December 10th. They want to meet with me and of

course I agreed. This requires some changes in the plans we had so far.

Please let me

have your suggestions. I will also need a full update about the CC-projects, especially

those which do not run according to Matts or Carols expectations. This might be a good

opportunity to calm things down.

Thanks and best regards

Florian

Subject: RE: meetings

Hi Florian, David:

We should for sure visit:

Floyd Bell  
Invensys  
Whirlpool  
International Truck

And also possibly:

Visteon  
Valeo  
Roche

It would take at least 4 days to cover these.

I think we should plan to meet with Matt and Carol during the above travels,  
e.g. dinner in Indianapolis with Carol and Detroit with Matt.

We will work out the itinerary with CC Electro.

Depending on works best for you and David travel wise, we could meet in AZ on the front or back end of the above. I suggest allowing one day for meetings and half day for recovery/fun activities. Both of you can arrive the same calendar day as your departure, but it is a long day. Perhaps you can leave on a Saturday, thus allowing Sunday to recover.

Best regards, Dirk

Dear David,

We will book you in Sierra Vista for Sunday afternoon, so you can recover a bit from your travel from Shanghai. We can show you the set up here on Monday a.m.

Have booked flight from Tucson to Newark NJ for Dec. 10 in the afternoon; please tell Cooper Wheelock that we will visit in the a.m. of Dec. 11<sup>th</sup>. Say we can be available from ca. 9:00am to 12:30 pm. Our flight to Columbus leaves at 2:50pm and we should allow one hour ca. to get back to the airport.

We will fly to Columbus Ohio on Dec. 11<sup>th</sup> in the afternoon and meet Floyd Bell on the 12<sup>th</sup>, possibly also Invensys. We will rent a car and then drive either up to Michigan or possibly to Indianapolis (Roche) on Wednesday night and end up in Chicago on Friday to hook up with Florian. You can schedule your visit to System Sensor for Friday afternoon. We can meet in that area Friday to Sun. Maybe it would make sense to stay in Milwaukee, Wisconsin on the weekend for saving money and easier access to restaurants, etc.

Best regards, Dirk

I have emailed you copies of the flight itineraries.

---

Dear David and Florian,

Visit update:

I have confirmed three tickets from Tucson to Chicago for Monday a.m.

As mentioned before we are confirmed with Matt and Carol on Tuesday evening and may take some time in the office on Tuesday afternoon for business update discussions before dinner.

Ellen is working on whether it might be possible to meet with someone from Roche on Tuesday afternoon.

Should I book a one way return flight for Florian to Chicago from Indy for Wed. a.m.?

We are confirmed with Floyd Bell in Columbus on Wednesday 10:00am and lunch and Jon is checking on Tim Kaiser from Invensys for Wed. afternoon. We will drive up to Detroit later on Wed. afternoon.

We are setting up visits in Detroit with following as possible:

Ford  
Visteon  
Valeo  
New Business opportunities  
Dinner with Matt

It doesn't appear necessary to visit WP at this time, things are going pretty well.

We will most likely drive back to Chicago on Friday, so David can schedule his return flight for later Friday afternoon, or Saturday a.m.

Please confirm soonest your arrival and departure information, so I can continue building the trip.

Best regards, Dirk

Subject: RE: meetings in USA

Dear David and Florian,

Visit update:

I have confirmed three tickets from Tucson to Chicago for Monday a.m.

As mentioned before we are confirmed with Matt and Carol on Tuesday evening and may take some time in the office on Tuesday afternoon for business update discussions before dinner.

Ellen is working on whether it might be possible to meet with someone from Roche on Tuesday afternoon.

Should I book a one way return flight for Florian to Chicago from Indy for Wed. a.m.?

We are confirmed with Floyd Bell in Columbus on Wednesday 10:00am and lunch and Jon is checking on Tim Kaiser from Invensys for Wed. afternoon. We will drive up to Detroit later on Wed. afternoon.

We are setting up visits in Detroit with following as possible:

Ford  
Visteon  
Valeo  
New Business opportunities  
Dinner with Matt

It doesn't appear necessary to visit WP at this time, things are going pretty well.

We will most likely drive back to Chicago on Friday, so David can schedule his return flight for later Friday afternoon, or Saturday a.m.

Please confirm soonest your arrival and departure information, so I can continue building the trip.

Best regards, Dirk

Dear All,  
of course I can join for a meeting with Carol and Matt. But prefer not to visit any customers at this stage.

Best regards

Florian

David, Florian:

I think CC Electro has a sales meeting Dec. 17/18, but I will run these dates by them. It is last week before Christmas break, so the week before would normally be better (week 50). Perhaps there is some way we can make a trip out of it.

Best regards, Dirk

Hello Dear Dirk

any of week 50 and week 51 is fine for me  
because I have customer visit untill 11Dec  
week 51 is better fo rme

Dear Greling  
please double check your time schedule  
and then I have to book flight ticket if date fixed

Can we meet in first in San Francisco that fly to TACSON together ?  
what is your suggestion ,Dirk ?

I know it will close to Christmas holiday if late

with very best regadr

Subject: RE: meetings

Hi Florian, David:

We should for sure visit:

Floyd Bell  
Invensys  
Whirlpool  
International Truck

And also possibly:

Visteon  
Valeo  
Roche

It would take at least 4 days to cover these.

I think we should plan to meet with Matt and Carol during the above travels, e.g. dinner in Indianapolis with Carol and Detroit with Matt.

We will work out the itinerary with CC Electro.

Depending on works best for you and David travel wise, we could meet in AZ on the front or back end of the above. I suggest allowing one day for meetings and half day for recovery/fun activities. Both of you can arrive the same calendar day as your departure, but it is a long day. Perhaps you can leave on a Saturday, thus allowing Sunday to recover.

Best regards, Dirk

Subject: meetings

Dear Dirk,  
I just spoke to David regarding the December meeting. We did not make any bookings so far.

Do you want David to see the likes of FB, Motorola...?  
We also think that we should invite Matt for a day or two.  
How many days should we spend in AZ?  
Please let me have your suggestions.  
Thanks and best regards  
Florian

**Subject:** RE: Digisound Orders

---

Dear David,

I talked to the buyer today. Digisound shipped them 3200 parts last week, which were their only parts and then informed them that they could not meet the requirements for the rest of July. We will ship them on Monday and with that they will be o.k.

I explained to her what has happened and why Digisound is out of parts. I requested that she not provide any further information regarding our operations to Digisound and she agreed.

You don't have to tell them anything today, or in any case confirm anything to M. Zeich. Just tell him you don't know what he is talking about and it makes no sense that you supply them from Bestar.

Best regards, Dirk

Dear Mr Wu

Please find the email from the Solelectron/JCI buyer below. He told us also that he would get the goods immediatly from Bestar.

Best regards  
Michael Zeich

Hello Steve,

I don't know what happened and why you have no product to ship to us but the ramification of a line down is huge which I cannot afford. I do have another supplier, going forward I will be purchasing from Bestar.

Thanks,  
Mandai

Mandai,

I have been following the e-mails in regards to the part that we are trying to procure for you. You have stated that if we can't fill the current PO's then you would like to cancel all PO's that you have placed with us. Do you have an alternate supplier? Who do I need to speak with in order to rectify this situation? Your assistance would be greatly appreciated.

Thank you,

Steve Trimble

**Subject:** RE: urgent information

---

Dear David,

We had a very good phone conference with Visteon, including Visteon Europe and have very strong support from purchasing and operations to change over to BeStar Tech. It is understood now that Digisound in the USA has changed their supply location without ever informing the buyer! He was very upset with that news. (He has still not actually been informed and in fact has not yet been contacted by the "new" Digisound). We have explained to Visteon that we have the stock available to immediately start supplying them, as soon as the administration is completed. It appears that we may also get authorization to manage the shipments to Europe, because in Europe Digisound has been responsible for some line down situations and in the USA they have never had a late delivery.

We confirmed that Digisound USA yesterday shipped two weeks supply of parts against zero releases from Visteon and without authorization to do so from Visteon. I had suggested yesterday this, but now it is confirmed. Throughout this process our number one concern has been how to maintain the customer loyalty with our management team while actually changing the supplying organization. So far we believe we have been successful, because Digisounds (Mr. Z & Co.) way of handling things is to do it without including the customer in the process, while we are including them in every step.

Anyway, the Digisound PO suggestion is completely out of reality. From our information regarding the F/WEX12NV LF, if Visteon does not return this weeks unauthorized delivery they will have parts until August 13<sup>th</sup> with no further shipments. Digisound has parts possible to get them through end of August. The 240K is probably enough parts to keep them until January 08. It seems that Digisound has not accounted for probably 120K parts that are now within the Visteon system.

Digisound has filed a formal request with CC Electro to provide them with any files that they are currently holding vis a vis Digisound business. We will review how to handle this in due course.

In the meantime, I have some action items for which I need a response.

1. From our meeting in China, please confirm the +/- 2 dB version of the F-B-P3009EPB-01 LF. Cost, feasibility etc. as was discussed.
2. Please continue to see if you can get me the IMDS filing reference for the Visteon version of FE23100PCW-03 LF

Regarding WP we will first focus on the F-B-P3009EPB for which Digisound will be out of parts by next week and there are strong requirements for deliveries all the way through August. We will then focus on the F-B-P3009EPB-01 LF, for which deliveries will need to start in later August.

Best regards, Dirk

Hello Dirk

that is good  
I failed to call you today  
and will try to call you tomorrow morning our time

FYI  
Jenny today received a message from Mr. Zeich stated following

Dear Jenny

We are in big trouble in the USA, because Dirk did not order properly. These are the quantities we need as fast as possible with part shipments immediately.

Visteon

VP7AMF 14B074 AA (FE23100-03 LF) = 46.000pcs

VP5W7F-14B074-AA(F/WEX12NV) = 240.000pcs

VP4V1F 18808 AB (F/BMS3432-02B) = 15.000pcs

Solectron

FE23100PCW-03 = 40.000pcs

Please advise your best delivery dates.

Ms Schwaller from our new customer service company will send the orders shortly.

Best regards

Michael
